

CANADIAN LAKES MECOSTA, MICHIGAN

Our development is over 5,000 acres in size and our total area is over 2 miles wide and 5 miles long.

Canadian Lakes is being built around 8 large lakes that have existed here in this valley since time began. Flooding has joined them together, making a total of over 1,000 acres of waterways, creating fish habitat nearly impossible to beat.

For the golfer we have TWO 9-hole golf courses. We have our own private ski slopes in the heart of the Clouds Valley with slopes large and extensive for nearly all types of skiers. We have a large outdoor swimming pool, heated and built in a large, pleasant park area with beautiful natural beaches. We have a double set of tennis courts at present and nother one planned for the future. We have a licensed landing strip with two runways and tie down area for the flying members.

There are other points of interest but this should give you a good idea of our commitment here and the result of good planning, execution and intent.

We do not allow touring of our development in respect to members already here. We ask you to call us collect, and ask any questions you might have regarding our Club. We will send you a report explaining in detail all of the above. Then if you wish to visit us here, we will be most happy to show you our efforts.
