available for snow on the many slopes. The Consumers Power Company engineered the flood-lighting of the slopes for night skiing. A swimming pool was built to act as reservoir for the snow machine in winter and for swimming in summer. One acre, near the warming shelter, was leveled for a skating rink. Logs were cut to firewood lengths for the huge open fireplace. Arrangements were made for fully qualified instructors, trained in the Canadian technique, and National Ski Patrol personnel.

The Summit Ski Area will be ready for full operation when the skiing season opens in December. It will have slopes, trails and facilities for experts, as well as special areas for beginners. Skiers, their families and friends are cordially invited to tour the area any week-end.

The Summit Ski Area is four miles south of Fenton, on Foley Rd. Additional information may be had from the Fenton Chamber of Commerce.
