Ski Club Is Preparing For Winter Season

There is much to be done at the Silver Ridge Ski Club property south of Oconomowoc (Highway BB) and members of the club have issued a call for persons to help now so that all will be ready when the first snow comes.

The club was officially formed last year but lack of snow made it impossible for members to use it. Club members pointed out that such a thing could hardly happen again this year in view of the usual heavy snow which blankets southern Wisconsin.

Last week the entrance road was filled and graded. Equipment was donated by Dominick DeCicco and Jaeckles Concrete Products for the work. This Saturday and Sunday workers are needed to clear brush on the hill, work on the ski tows, help construct the toboggan slide, set up the lights for night skiing (a generator has been obtained for this) and paint the outside of the chalet. The workers should report at noon each day.

The club hopes to hold an open house in the near future so residents may see the progress and development of the ski area. Plans call for a number of ski runs in addition to a toboggan slide.

Persons seeking information about it should call LO 7-4143.
