

Ideal Weather, Plenty of Snow Skiing Prospect

"Ideal" and "best yet" will be skiing conditions at the Muskegon Ski club's runs in the State park this week end. President Art Workman said today.

Snow that fell during the night and yesterday provided a fresh covering of fine powdered snow granules.

The big powered tow that can handle three skiers at once has been moved to the main run. The second tow is being moved to the ski jump.

Mr. Workman expects a greater number of skiers Saturday and Sunday than past week ends and more spectators to watch the sportsmen and women in the picturesque winter setting.
