

## *Atwood Ski Facilities Closed*

**THE MUSKINGUM CONSERVANCY** District announced today that the ski slope and tow, located at the Atwood Golf and Ski area near the Atwood Lake Lodge, will not be operated this winter.

There will be a snow mobile operation carried on from the club house which will utilize marked trails in the area. This facility, operated by Gary Spahr, will provide the rental of snow mobiles on weekends only whenever natural snow is available. If public demand is great enough, it will also be carried on throughout the week.

Scott Slates, Manager of Atwood Lake Lodge, advises that Lodge rooms are available any time during the winter months, even on weekends. The Lodge, with its indoor swimming pool and exceptional dining facilities has been, since its opening in June, 1965, the outstanding facility of its type in this part of the United States. Its location on a hill overlooking Atwood Lake provides even in the winter some of the finest views to be seen anywhere.

In addition to its 104 rooms, it has seventeen 4-bedroom cabins available, which are completely winterized.

A Package Plan, which gives reduced rates in the Lodge or cabins, is available during the winter months and full information may be had by either writing or phoning the Atwood Lake Lodge, at Dellroy, Ohio.
